

An Industry First

A Verification System for *any Process*

Control It

Connect and Control Your Devices

Complete It

Guide Operators through Complex Work Instruction

Verify It

Error Proofing Improves Quality and Production Yields

Report It

Persistent Data Provides Traceability and Custom Report Generation

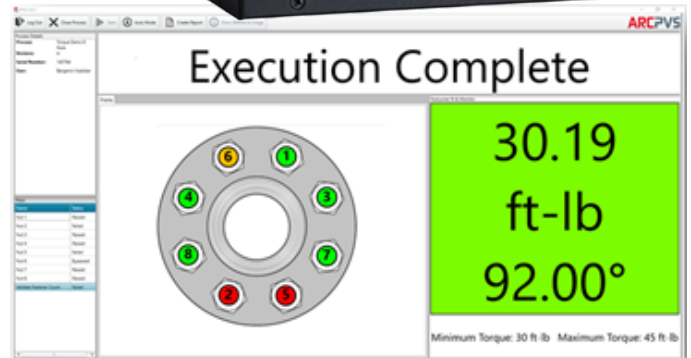

ARCPVS[®]

PROCESS VERIFICATION SYSTEM

WHAT IS ARC PVS?

- Manufacturing Process Standardization and Verification
- Guide Operators through Complex Work Instructions
- Serial Number Traceability
- Rapidly Respond to Production Trends
- Create, Share and Edit Work Instructions
- Device Control and Feedback
- Error Proof Your Workflow
- Generate Custom Report Sheets
- Time-Stamped Results for Warrant Claim Verification
- Persistent SQL Server Storage
- MES Integration
- Built In Service Tracker
- Custom Device API
- Industrial Grade Components
- 1x Network Ethernet Port, 1x Device Ethernet Port

ARC PVS PLUS

- Integrated 8 x 24v Digital Ins and 8 x 24v Digital Outs for tool control/ feedback.
- Smart internal UPS power management – cannot corrupt storage from power failure
- 2 Additional Device Ethernet Ports
- RS232 Serial Device Support
- Up to 1 TB of internal solid-state storage.

ARC Technology Solutions LLC is a leading supplier of Innovative technical solutions, which increase our customers' manufacturing Productivity. ARC provides unique Manufacturing Productivity Solutions leveraging our core-competencies in software, electrical and mechanical engineering design and manufacturing.
